

Site Specific Implants for Advanced Implant Therapy: An Innovative Treatment Solution Workshop for Experienced Implant Dentists

(7 Hours of CE Accreditation)

Course Description:

Intended for experienced surgical specialists and restorative dentists, this course will address advanced treatment solutions that lead to accelerated implant therapy. Single unit, partially edentulous, and fully edentulous patient subsets will be covered. Established experience in placing and restoring dental implants is required.

The techniques shared will provide solutions for patients wishing to accelerate their implant therapy through the avoidance of pre-implant grafting, post extraction immediate implants, and immediate provisionalization or loading. Complex anatomical limitations will be mastered using site-specific implants designed to improve outcomes in these challenging circumstances. The course will also cover prosthetic solutions that improve simplicity and lead to greater patient acceptance.

Participants can expect comprehensive surgical and prosthetic hands-on exercises that will teach these novel innovations and facilitate the ability to incorporate them into their practice.

Top 5 Course Objectives:

- To be able to diagnose and treat patients for implant therapy with challenging dental anatomy
- To learn how to maximize available bone while maintaining the restorative platform with an angled implant and/or tapered, wide diameter implant
- To understand post extraction immediate implant placement simplicity guidelines in both anterior and posterior applications
- To learn how to eliminate the need for angled abutments in immediate full arch rehabilitation
- To learn how to eliminate the need for cement retained restorations in the anterior maxilla

Speakers:

Joshua Campbell, BS, DDS

Steven J. LoCascio, DDS

DATE: November 10, 2017

REGISTRATION: 7:30am

TIME: 8am – 4pm

LOCATION: Roe Dental Lab

7165 E. Pleasant Valley Rd. Independence, OH 44131

CREDIT HOURS: 7

AUDIENCE: Experienced Surgical and
Restorative Implant Clinicians

TUITION: \$299 Surgeon, \$99 GP
