

TLZ™ Monolithic - Beautifully Polished Zirconia

ROE has an extensive history fabricating zirconia restorations. TLZ is our all-zirconia, monolithic crown/bridge restoration. Not all monolithic zirconia crowns look and perform the same! We use a premium pre-shaded multilayered zirconia and apply a unique liquid ceramic translucent stain that yields the best-in-class esthetics. TLZ offers a combination of strength, translucency, and beauty that has become immensely popular.

PFZ™ Layered - Porcelain Fused to Zirconia

All zirconia frameworks and full-contour restorations are designed and milled in-house, ensuring optimal design for longevity and porcelain support. Layered PFZ can be used for implant restorations, multiple-unit bridges, full-contour zirconia, and even California Bridges.

PFZ Bridge	\$239	9 days in lab

zRc™ Monolithic - Enhanced 4Y Translucency

zRc is the latest in the 4Y class of zirconia which means it has a 5% higher translucency. It's also made domestically! zRc is one of the cutting edge of materials offered here at ROE. With the same strength as our TLZ crown, zRc is a low cost zirconia alternative.
