Surgical Guides

Are you looking for an expert team to support your implant practice with predictably accurate results?

ROE has been a pioneer in surgical guides since 2004. After nearly two decades, and tens of thousands of cases, we have developed a turn-key service that keeps our customers coming back.

Standard Guides: Standard guide packages include diagnostic workup, planning session (online or pre-recorded video review), drill report, and surgical guide.

Or are you a do-it-yourselfer, who prefers to handle part of the surgical guide process? We can help by providing à la carte services for planning, designing, or printing your tooth supported guides, all at an even lower fee.

Stackable Guides: We would love to support your full-arch cases with stackable guides, including our signature solution, CHROME GuidedSMILE™.
